# Ambulatory Surgery

Please read this pamphlet and bring it with you to your Preadmission Clinic appointment.

Welcome to Women's College Hospital Preadmission Clinic for ambulatory surgery. The goal of this program is to prepare you for your surgery and answer any questions you may have. A preadmission assessment will be booked by your surgeon's office and is required for all patients prior to the surgery date. If an assessment is not completed your procedure may be cancelled.

## Preparation for Preadmission

### What will the Preadmission Clinic visit include?

- > pre-registration for your surgery
- > interview with a nurse who will complete an assessment
- > blood tests, ECG, X-rays if required
- > instructions to prepare you for surgery, discharge home and self-care
- > anesthesia and medical consults if required
- > assessment by physio/occupational therapist and homecare co-ordinator if indicated
- > appointment will take 30 - 90 minutes depending on your type of surgery

### What should I bring to the Preadmission Clinic visit?

- > health card
- > any medications you are taking – including all herbal/vitamin supplements and over-the-counter medications – in the original containers
- > forms from your surgeon for you to complete, for example history and physical from GP, and preoperative questionnaire
- > letters/tests from specialist if indicated by your surgeon
- > support person if required
- > interpreter service is available for all non-English speaking and sign language requests; please notify your surgeon's office ahead of time to arrange these services for your appointment if required

You can eat and take your medications as usual the day of your Preadmission Clinic appointment.

## Preparation for Surgery

### Night Before Surgery

Unless instructed otherwise:

- > **Do not eat after midnight the day before your surgery.**
- > **You may drink clear fluids only up to 4 hours prior to your surgery time.** Clear fluids include water, apple juice, black coffee or tea, clear pop. Do not drink any milk or milk products, orange juice or other citrus juices, or alcohol.
- > **Take nothing at all by mouth the last 4 hours before your surgery, including gum, candy or water.**

### On the Day of the Surgery

**Check in at the Surgery reception desk on the 8th floor.**

You must arrive in Surgical Daycare 2 hours prior to your surgery time unless instructed otherwise.

You may take your medications as instructed by the physician on the day of surgery with small sips of water.

You should bathe or shower the night before or morning of surgery.

Due to the limited waiting room space, we recommend that only one support person accompany you to the hospital. Your support person is not required to stay at the hospital while you are in surgery.

### What to bring to the hospital

- > health card
- > comfortable clothes and flat shoes to wear home
- > socks to wear in surgery
- > medical equipment/devices: binders, support bras, crutches, knee braces, sling and CPAP machines as instructed
- > containers for your dentures, glasses/contact lenses and hearing aids, which must be removed prior to surgery
- > if you are staying overnight, bring your own personal toiletries, non-skid slippers and housecoat and any medications you normally take in the original containers.

### Do not wear

- > jewelry; remove all body piercings
- > perfume/cologne or any other scented products, body lotions/cream
- > makeup
- > coloured finger nail polish

Leave all valuables – including large amounts of money, credit cards, jewelry and technology devices – at home. The hospital will not be responsible for any lost or stolen items.

Women's College Hospital is a fragrance-free facility. We ask that all patients and their visitors refrain from wearing any scented products for the safety of other patients and staff.

## After Surgery

Surgical Daycare (SDC) patients are discharged home the same day as their procedure. A nurse in SDC will assess you and ensure you are safe to go home once you meet discharge criteria.

Due to the anesthetic and other medications you may receive in the hospital, your mental and physical function may be altered.

### For 24 hours after anesthesia or sedation:

- > do not drive a car or operate any machinery
- > do not consume alcohol or other sedatives as their effects will add to those of your anesthetic
- > do not make any legal or important decisions

Specific instructions related to your surgical procedure and prescription will be given to you prior to discharge.

### IMPORTANT INFORMATION

If you are having day surgery you **MUST** have a responsible adult to escort you home and stay with you overnight. For your safety, you are not permitted to take a taxi home without an escort. Your procedure will be cancelled if you don't have an escort home.
