### Ultrasound

#### General Ultrasound
- Abdomen (gallbladder, pancreas, spleen, liver, kidneys, aorta)
- Abdomen/pelvis complete
- KUB (kidneys, ureters, urinary bladder)
- Hernia only

#### Female Pelvis
- Pelvis
  - Transvaginal
  - Sonohysterogram

#### Male Pelvis
- Pelvis (transabdominal, includes bladder, prostate seminal vesicles)

#### Vascular
- Leg Doppler (Venous only)
  - Bil R L
- Arm Doppler (Venous only)
  - Bil R L

#### Obstetrical
- Dating
- NT
  - Anatomic
  - NT (11+3-13+3 weeks) + Anatomic (19-20 weeks)
- Biophysical Profile
- Assessment of fetal growth
- Other:

#### Small Parts
- Face
- Thyroid
- Neck
- Chest
- Groin
- Scrotum
- Soft tissue/ lump

#### X-ray

#### Abdomen:
- Cervical Spine
- Thoracic Spine
- Lumbar Spine
- Sacrum
- Coccyx
- SI Joint
- Pelvis
- Pelvis & Hips
- 3 Foot Spine
- Skeletal Survey
- Other:

#### Head & Neck:
- Single
- 2 Views
- Neck or Soft Tissues
  - Orbits pre MRI
  - Other:

#### Chest:
- Chest PA & LAT
- Chest PA-Immigration
- Ribs R L Bil
- Sterno-Clavicular JTS.
- Sternum
- Other:

#### Spine & Pelvic:
- L
- R
- Clavicle
- A.C. Joints
- Shoulder
- Scapula
- Humerus
- Elbow
- Forearm
- Wrist
- Scaphoid
- Hand
- Digit 1 2 3 4 5

#### Upper Extremities:
- Hip
- Femur
- Knee
- Tib, & Fib
- Ankle
- Foot
- Toe 1 2 3 4 5
- Calcaneus
- 3 feet or 4 feet leg
- Other:

#### Lower Extremities:

ULTRASOUND-PATIENT PREPARATION GUIDELINES

Abdomen
- Morning appointments: fast from midnight
- Afternoon appointments: fast following a light fat free breakfast at 0700 hours (e.g. dry toast and juice).

Combined abdomen and pelvis or abdomen for blood in urine
- Fast (as described above) AND refrain from voiding for 2 hours prior to the examination.

Pelvis (non-pregnant female or male)
- Follow a normal diet and refrain from voiding for 2 hours prior to the examination.
- Females declining Transvaginal (TV) examination may have to drink fluids in order to sufficiently distend their bladders for a trans-abdominal pelvic examination.

Pregnancy (Obstetrical)
- Eat and drink normally. You are not required to drink extra fluids before your ultrasound. Do not empty your bladder for one hour before your exam.

Hysterosonogram: please inform booking person of the first day of your last period
- If no previous WCH/MSH/UHN pelvic imaging refrain from voiding two hours prior to examination.
- If premenopausal (having periods) or postmenopausal on sequential hormone replacement (you have regular period-like bleeding), your exam should be done between day 6 and day 10 of your menstrual cycle.
- If postmenopausal and do not have periods, your test can be done at anytime.
- Take manufacturers recommended dose of ibuprofen (Advil or Motrin) or any other pain medication you normally take for menstrual pain 30 minutes prior to the scheduled examination time.

No special preparations are required for the following examinations:
- Leg and arm Doppler
- Thyroid
- Testicular (scrotal)
